

Hosted Exchange

If you're looking for a secure, mobile email system for your business, our hosted Microsoft Exchange™ email plans present the perfect solution. MS Exchange™ lets organizations reap the benefits of using Exchange accounts in conjunction with Microsoft Outlook and mobile devices (e.g. Blackberry) without having to invest in the costly infrastructure themselves.

Exchange email is stored centrally on Aspen Communications managed servers, providing redundancy and fast connectivity from wherever you are. This gives users access to their email, calendar, contacts and shared files by a variety of means, including Outlook™, Outlook Mobile Access (OMA) and Outlook Web Access (OWA), which are all provided for free.

Our Exchange Pack lets you start using MS Exchange with minimum investment in terms of time and money - simply add users as your needs grow. Account configuration and management is achieved via an easy-to-use control panel. Migration from your existing platform is simple – our consultants will guide you through it step by step to ensure the process is swift and painless!

What is Hosted Exchange?

Microsoft Exchange is the world's foremost business email system, enabling communication and collaboration for many of the largest organizations. Microsoft Exchange 2007 enhances company productivity through numerous advanced features:

- Real-time-synchronized email, files, calendars and contacts through the Microsoft Outlook client
- Mobile access on handheld devices through the Microsoft Mobile client
- Advanced web mail through Outlook Web Access
- Shared calendars that let employees see colleague availability to schedule meetings, book conference rooms and plan projects
- Shared task lists that allow 'to do' lists to be created and assigned, then shared with team members
- Synchronized contacts which guarantee your personal address book will never be lost or misplaced, either on your PC or mobile phone

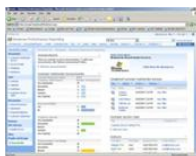

Why Outsource to Aspen Communications?

Buying, setting up, maintaining, managing, supporting users and backing-up Hosted Exchange and a Blackberry Server is an expensive exercise, especially if you factor in the associated management time and costs. Aspen Communications removes this headache and these high costs by providing customers with a completely outsourced solution - we secure, backup, patch, manage and support the Exchange environment for you, in our world-class data centers on our high-availability hardware infrastructure - ensuring it's available and supported 24 hours a day, 7 days a week. Aspen Communications does this all for a low monthly per user fee.

Benefits and Features

- Huge Cost Savings - up to 50% less, and no CapEx – you pay a low monthly per user subscription fee
- Zero Management Time - Aspen Communications manages it for you
- No Infrastructure Required - no new servers or licenses to buy and manage
- 24x7 Support - Aspen Communications is always available to help
- Exchange 2007 Feature Set - the latest and greatest versions
- Blackberry/Mobile email
- Virus and Spam Protection – managed and supported by Aspen Communications
- Highly Available (99.99%) & Business Continuity – backed-up, always managed, always on
- Archiving and Compliance

**Enterprise-class
email for a
fraction of the
cost – starting at
\$10/month/user**

Benefits of Aspen Communications Hosted Exchange:

- Huge cost savings
- Aspen Communications manages everything
- No infrastructure required
- Round-the-clock support
- Highly secure
- Archiving and compliance
- Optional Blackberry/Active-Sync
- Powerful Control Panel
- 99.99% Uptime Guarantee

Key Features

1-4 GB Aggregateable Storage

Our Exchange mail includes a generous amount of storage, enabling you to save more of your critical business correspondence.

Full licensed copy of Microsoft Office Outlook 2007 or Entourage 2008

Our hosted Exchange service includes a free copy of Outlook 2007 or Entourage 2008 for all mailbox users in your company. In-house Exchange 2007 no longer includes Outlook 2007.

Fully functional mailbox available through Outlook Web Access (OWA)

Outlook Web Access 2007 allows you to connect on the move and have full access to your mailbox, calendar and more from any browser.

Support For BlackBerry, Windows Mobile ActiveSync

Get your work done anytime, anywhere. Synchronize your email messages, schedules, contact information and task lists with your Windows Mobile device or BlackBerry.

Spam defense and virus protection

Each Exchange mailbox is protected from the threat of spam and viruses by our integrated security platform. Every email is scanned by at least 5 antivirus engines and multiple spam filters.

Remote backup solution

Aspen Communications is part of your disaster recovery plan. Because we host your email off-site in a secure location, you can continue to communicate with your clients in the event of a disaster.

Public folders for storing documents and/or emails

Public folders are shared company folders that allow staff to collaborate using shared contacts, calendars and task lists to maximise productivity.

Powerful control panel

- Manage users/companies and groups
- Disk space and mailbox storage limits
- Bandwidth and mailbox delivery limits
- Manage protocols: Outlook MAPI/OWA/RPC over HTTP/IMAP/POP3/SMTP
- Distribution lists
- Mail forwarding, auto responders
- Full Shared folders
- Manage mobile access (Windows Mobile, iPhone, BlackBerry, etc.)
- Support for multiple emails and aliases
- Personal contact information management

Hosted BlackBerry Enterprise Server

Powered by Aspen Communications and RIM, this is the ultimate mobile email solution for business. Your BlackBerry handheld device allows you to access Internet, email, messaging, and phone & calendar services, enabling you to stay productive and effective worldwide – and always synchronized between your BlackBerry and your PC. Active Mail combines the powerful collaboration features of Hosted Exchange 2007 with the latest BlackBerry Enterprise services to deliver the most comprehensive hosted business messaging environment possible.

Migrations without Downtime, and Save \$

Do you want to improve your email and collaboration solution for your business? Are you already using Exchange and managing it in house? Aspen Communications makes it easy to move to our Exchange platform.

Our consultants can provide you a simple step-by-step guide on how to move your email, helping ensure that migrations are fast and painless whether you're moving from an existing outsourced provider, your own Exchange and Blackberry servers or from POP3 (very basic) email.
